

Nora Feldkamp

BACKEND ENGINEER

Ten years of building payment and scheduling systems that stay up. Happiest where correctness matters more than novelty, and where the on-call phone stays quiet.

EXPERIENCE

Senior Backend Engineer

05/2021 – present

Nordlicht GmbH, Leipzig

- Owns the settlement service: 40 million transactions a month
- Cut end-of-day reconciliation from 90 to 7 minutes
- Mentors three engineers and runs the on-call rotation

Backend Engineer

08/2018 – 04/2021

Fahrplanquelle e.G., Dresden

- Open timetable API for regional transit, 2,800 daily users
- Moved the import pipeline from nightly batches to streaming

Software Developer

03/2016 – 07/2018

Kestrel Logistik AG, Halle

- Route planning for 200 vehicles, written in Go
- Introduced integration tests; releases went weekly instead of monthly

Working student, Data Engineering

09/2014 – 02/2016

Universität Leipzig, Institute for Computer Science

EDUCATION

M.Sc. Computer Science

10/2012 – 09/2015

Universität Leipzig

B.Sc. Computer Science

10/2009 – 09/2012

HTWK Leipzig

PROJECTS

fahrplanquelle.de

Open departure data for 90 regional lines

gartenfunk

Soil sensors on LoRaWAN, 40 gardens in Leipzig

ledgerlint

Static checks for double-entry bookkeeping files

Application as Senior Backend Engineer

Dear Ms Brandt,

your posting mentions settlement systems that have outgrown their nightly batch runs. That is the problem I spent the last four years on: at Nordlicht I moved reconciliation from a 90-minute nightly job to a seven-minute streaming pipeline, without a single missed settlement window.

I would like to bring that experience to your team and would be glad to talk.

Kind regards,

A handwritten signature in black ink, consisting of a series of connected loops and curves, resembling a stylized 'N' and 'F'.
